## Handy Manual Pulse Generator

 <br> \section*{HC1 series <br> \section*{HC1 series <br> <br> Outline} <br> <br> Outline}

HC1 is the most compact model of all our MPG series, developed for usage in numerous industrial areas.

## Features

- Compact, thin-line and lightweight (26mm)
- Axis/Multiplication selection can be set according to customers' requirement
- Sealed structured box
- RoHS compliant (box/cord)
- Exclusive easy-to-attach holder as a standard accessory
- Rubber magnet for option
- Logo can be printed on the wheel cover

## Specifications

| 1. Body |  |
| :---: | :---: |
| Dimension | $124 \times 73 \times 26(\mathrm{~mm})^{*}$ |
| LED Visible Indicator | DC24V Green |
| Noise Immunity | EN50082-2 compliant |
| Other Features | Logo available on the wheel cover |

* excluding hook, switch and knob

| 2. Mechanical specifications |
| :--- |
| 2.1 Rotary Encoder Unit |

* See RE45B page for details

### 2.2 Selector Switches

* See MR8A/MR8C page for details

| 3. Environmental specifications |  |
| :---: | ---: |
| Operating temperature | $-10^{\circ} \mathrm{C} \sim+60^{\circ} \mathrm{C}$ |
|  | $14 \mathrm{~F} \sim 140 \mathrm{~F}$ |
| Storage temperature | $-40^{\circ} \mathrm{C} \sim+70^{\circ} \mathrm{C}$ |
|  | $40 \mathrm{~F} \sim 158 \mathrm{~F}$ |

| 4. Curl/Straight Cords |  |
| :---: | :--- |
|  | $19 / 25$-conductor shielded cable <br> 19-conductor: select from $2 \mathrm{~m}, 3 \mathrm{~m}, 4 \mathrm{~m}, 5 \mathrm{~m}$ <br> 25-conductor: select from $3 \mathrm{~m}, 5 \mathrm{~m}$ <br> (We will select either 19 or 25 -conductor in accordance <br> with required functions) <br> For further details, please see the catalogues for curl <br> cords |
| Straight <br> Cord | Also available |

| C. Connector Unit |  |
| :--- | :--- |
| Connector | Waterproofed connector to be attached on the end of <br> the cord optionally provided |

## Warranty

1 year from the date of shipment.
$\mathrm{HC1}$ main unit with curl cord

Original Holder(THA)

Material: SPCC(t2.3)
(Black chromate filming)

## Part Number Designation

※1 100 clicks / 25 pulses per rotation.

|  power supply voltage <br> 1 12 V <br> 5 5 V <br> D 5 V <br>  (a differential output) <br> 2 24 V |
| :---: |
| (for photocoupler only) |

$※ 6$ The starting position of a cordswithe is 0 , and the step angle is $30^{\circ}$. $※ 5$

|  | Options of connectors |
| :---: | :---: |
| 0 | without connector |
| 1 | With a male side connector |
| 2 | With a male \& a female side conector |
| 9 | With a specification connector |

$※ 5$ In case nothing specified, there will be no connector attached.
$※ 4$

|  | Curl Cord |
| :--- | :--- |
| 1 | With 2 m curl cord* |
| 2 | With 3 m curl cord |
| 3 | With 5 m curl cord |
| 4 | With 4 m curl cord* |

$※ 4$ Tosoku choose the number of cables by the function. *19 conductors only

|  | Logo Mark on Dial |
| :---: | :---: |
| B | With TOSOKU Logo Mark |
| C | With No Logo Mark |
| D | With a specified Logo Mark |

| ※3 |  | Axial Select Description | Magnification Select Description |

## How to mount knobs for selector switches (HC1/HM/HT series)

1. All switches select OFF circuits (position no.1) when fully turned counterclockwise. 1 click/2 clicks clockwise will make a connection of position no.2/no. 3 with COM which feeds a signal for each.
2. If the indications on the plate begin with "OFF", " 0 " or any other indication to render disconnection, confirm that the shaft is turned fully counterclockwise to the end, then screw the knob on to it within 5kgf.cm of torque.
If the indications begin with " X ", "x1" or any other indication to render connection, 1) turn 1 click clockwise from the very left end, 2 ) adjust the white line on the knob with the indication, then 3) tighten the screw of the knob (cf. picture 2. multiplier switch).
3. The standard wiring diagrams indicated do not necessarily be consistent with the actual delivered products. Confirm the diagrams on the specifications when mounting the knobs.
4. When the knob is turned, it will stop where stopper-pin is inserted. To alter the position to stop, refer to picture 3 and 4 , then re-insert the pin into the designated position.

Picture 1. plate

Picture 2. Indications and wiring

Picture 3. The back of the knob (holes for stopper-pins)

Numbers and alphabets with $O$ show positions to start, and those with $\square$ show positions to stop. Select the appropriate position from the picture 4 and insert the pins into the correspondent positions.
e.g. The plate shown in the picture 1 will be set as follows.
Axis Selector: A, 4/ Multiple Selector: B, 3.

Picture 4. Correspondent Positions of the Pins
